IS OUR LOVE

a completely scientific study conducted by me, myself & several strangers on the internet.

THINGS I NEED TO KNOW

- ☐ Do you also rehearse conversations that will probably never happen?
- ☐ Do you open a message, forget to reply, then feel like too much time has passed to reply?
- ☐ Do you need alone time and then somehow get offended that nobody is talking to you?
- ☐ Do you create an entire future scenario based on one tiny interaction?
- ☐ Do you walk into a room and immediately forget why you're there?
- ☐ Do you sometimes need *three business days* to recover from socializing?
- ☐ Do you ever Google something extremely specific just to confirm another human has experienced it?

OKAY, BUT THIS ONE IS
WEIRDLY SPECIFIC...

Something I do that I've always wondered:
"Does anyone else do this?"

I NEED THE GROUP'S OPINION

A question I would anonymously ask
1,000 other women:
